

HYDRO PROJECT MANAGER - M/F H/F

Chez Voltalia, nous sommes passionnés par les énergies renouvelables! Nous sommes producteur d'électricité à travers l'éolien, le solaire, l'hydroélectricité, la biomasse et le stockage et également fournisseur de services pour des clients tiers tels que le Développement, EPC, O&M et la Distribution. Aujourd'hui, nous sommes dans 20 pays, répartis sur 4 continents, et offrant une capacité opérationnelle globale à nos clients. Nous sommes cotés sur le marché Euronext à Paris depuis juillet 2014.

THIS POSITION IS LOCATED IN FRENCH GUIANA

Our EPC Business Line is looking for a Hydro Project Manager who will have the following responsibilities:

- Lead the Project on the preparation phase (Pre NTP) including Site team definition, documentation review and validation, procurement of all equipment and subcontractors
- Manage the execution of hydro power plants throughout its life cycle within schedule, budget, and quality
- Lead and take full responsibility on all Project controls processes: cost controls, contract management and scheduling
- Lead the project team members both within the function (engineering, procurement, construction teams, contract management, HSE) and external within Voltalia (finance, asset management, etc)
- Direct interface with Client at project level
- Liaise with development and project finance teams to identify possible conflict on execution because of their different areas of concern (permitting and funding)
- Management of the project contractual obligations
- Establish cost report and KPIs for control of the project
- Compliance with Voltalia policies and procedures about HSE policy.

Position size: Investments up to 200 M€.

QUALIFICATIONS

- Master's degree in Engineering (civil, electrical, mechanical, etc.)
- Minimum 10 years' experience in execution of EPC projects (large civil works involved preferably roads, dams, hydropower plants) of medium to large size in remote areas
- Have large experience into preparing and executing complex projects in remote areas worldwide
- Deep knowledge on Project controls (cost controls, contract management and scheduling)
- Consolidated knowledge in planning software (Project, Primavera, etc.)
- Fluent in French and English
